Elysium Neurological

Badby Park

Neurological Care Centre

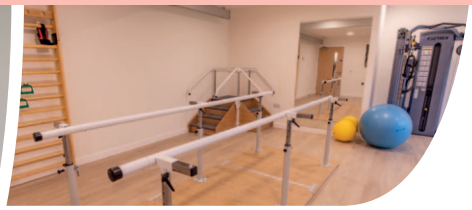
Overview

Elysium Neurological provides specialist rehabilitation and care for people with neurological illnesses, acquired brain injuries and spinal cord injuries. Badby Park is a purpose-built centre set amidst 58 acres of beautiful parkland, on the edge of Daventry near Northampton providing 88 individual ensuite rooms to meet the specialist requirements of those affected by neurological conditions.

Pathways

We are committed to providing the highest standard of neurological care and rehabilitation, for a wide range of specific conditions with an even wider range of symptoms. Badby Park provides specialist care and expert therapeutic interventions encompassing physical, psychological, emotional and social needs of men and women affected by the majority of neurological conditions including:

- **Complex Physical Conditions -** including disorders of consciousness, spinal injury, tracheostomy care, ventilation and complex stroke
- **Neurorehabilitation –** assessment, rehabilitation, flexible packages for Acquired or Traumatic Brain Injury (ABI or TBI) or neurological conditions
- **Neuroprogressive Conditions -** including Huntington's disease, Motor Neurone Disease, Multiple Sclerosis and Parkinson's disease
- **Complex Dementia –** including Frontotemporal, Pick's, Lewy Body, Korsakoff, young-onset or vascular



Accommodation

Accommodation is split across four individual units with additional purpose-built therapy units. We are experienced in supporting people moving out of hospital who require a period of physical and neurological rehabilitation before moving back home. We also support people who require a period of short-term intensive therapy as well as long term ongoing rehabilitation. Packages of complex physical healthcare in relation to progressive conditions or a neurological event are also available, including tracheotomy care, for those in a prolonged disorder of consciousness and those on end of life are also available.

Therapy Suite

Gymnasium - a purpose-built gym with specialist equipment including standing frames, walls bars, gym equipment and easy to use celling hoists. Supported by the therapy team and therapeutic programmes to maximise recovery and maintain wellbeing and quality of life.

Hydrotherapy – our physiotherapists have access to onsite hydrotherapy pool. Residents can access the pool as part of their treatment programme to support musculoskeletal rehab or as a useful technique to reduce muscle spasm and increase strength whilst supporting bodyweight.

Music room – Residents can participate in music therapy with our qualified Music Therapist.

Sensory room – a multi-sensory environment with colour-shifting lights, projected images and sounds, tactile objects and scents to stimulate and relax.

Activities of Daily Living (ADL) kitchen – allows residents to practise functional tasks related to meal preparation and cooking. Accessible for wheelchair bound residents who need height adjustable appliances and work surfaces.

Family visiting room - a quiet spacious lounge room where residents can spend private, quality time with family and friends including visiting children.

Palliative care suite - a specially designed care suite for people who are reaching the end of their life where family members can stay and spend quality time with their loved one.

Grounds - residents and their families have access to extensive outdoor spaces that surround our facilities as well as a beautiful historical walled garden, terraces, courtyard and a family café. There is ample space for parking for all staff and visitors.

Outcomes

Evaluation of the effectiveness of therapeutic programmes takes place through use of observational recording measures, behavioural recordings, discipline specific measures and clinical supervision. Progress is routinely reviewed at weekly clinical review meetings. Widely accepted and recognised outcome measures are routinely completed on admission, at major reviews of progress and at discharge. Together these measures underpin goal planning and track responses to rehabilitation and care with a focus on quality of life.

Team

We have an expert Multidisciplinary Team (MDT) with specialist skills including nursing staff, psychology, speech and language therapy, occupational therapy, dietetics, physiotherapy, music therapy, neurorehabilitation consultant and neuropsychiatry. Our team is based onsite to ensure that each resident receives the specialist interventions and support they need to achieve their individual goals and outcomes.
